

# An Elite ST Attitude...

Designed with a patented wear layer to provide unlimited design options, Elite Tiles offer a new brand of visual excitement to any club interior. Available in 12 standard designs, Elite colors coordinate with fitness equipment as well as other flooring options. As a bonus, these good-looking tiles feature a pedestal underside, preventing unsightly cable clutter by allowing you to route fitness equipment wiring beneath the surface. The modular 2'x2'x1" tiles can be laid over your existing floor, saving you time and money. They are easier and faster to install than traditional glue down floors because no adhesive is needed. The unique dowel fastening system gives you the ability to quickly move or replace tiles as desired. And did we say durable? These 1" thick footed tiles

are engineered to provide the ultimate in durability. They also surpass the noise and shock absorptive qualities of any other fitness floor. Elite can withstand the constant dropping of weights and pounding of equipment without showing wear and tear. For trainers on their feet all day, Elite provides welcome relief from traditional hard surface flooring. The pedestal underside provides the perfect blend of comfort - cushioned, yet supportive. Your staff and club members will thank you.

Elite ST sets a new standard for fitness flooring. Elite ST incorporates a patented polymeric wear surface construction into the design of the time-tested 2'x2'x1" tile system to produce the ultimate combination of strength and world class good looks in a resilient flooring system. Unlike the traditional speckled top surface of the Elite tile, Elite ST offers a solid color of warm earth tones in terra cotta, green, gray, and black. The Elite ST provides a high tech, environmentally conscious "attitude" in your facility. This is a flooring solution for today's world.
