

LEED Leadership in Energy and Environmental Design

Reduce the impact of your building on the environment

There are 6 performance areas:

- ✓ Sustainable Sites
- ✓ Water Efficiency
- ✓ Energy & Atmosphere
- ✓ Materials & Resources
- ✓ Indoor Environmental Quality
- ✓ Innovation & Design Process

How can **Centaur** products help a building reach a higher level of certification?

By contributing in three of the six performance areas

Points are awarded based on the overall adherence of materials used within a credit grouping

1. Materials and Resources Credit - Recycled Content

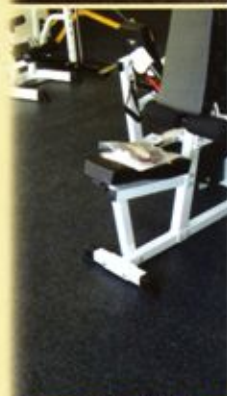

- Credit 4.1: (1 point) for materials that have the sum of post-consumer recycled content plus one-half of the post-industrial content constituting at least 5% of the total value of the materials in the project
- Credit 4.2: (1 point) for materials that have the sum of post-consumer recycled content plus one-half of the post-industrial content constituting at least 10% of the total value of the materials in the project

2. Materials and Resources Credit - Regional Materials

- Credit 5.1: (1 point) for materials using a minimum of 20% of building materials and products manufactured regionally within a radius of 500 miles.
- Credit 5.2: (1 point) for materials using a minimum of 50% of building materials and products manufactured regionally within a radius of 500 miles.
- Credit 6: (1 point) natural rubber is a renewable material which is found in our product (less than 1%) and more than 1% in our decor product line. You must use 2.5% of the total value of all building materials and products used in the project (based on cost) in order to earn one point
See chart for SportFloor's contribution to these credits

3. Indoor Environmental Quality Credit - Low-Emitting Materials

- Credit 4.1: (1 point) VOC content of adhesives and sealants less than 50 grams per litre
 - Adhesive one part - solvent free
 - Adhesive two part - VOC compliant
